

Workboat with hoist boom

Description:

The Eureka Work Boat (EWB) is built for repair, fuel transport or maintenance to other vessels.

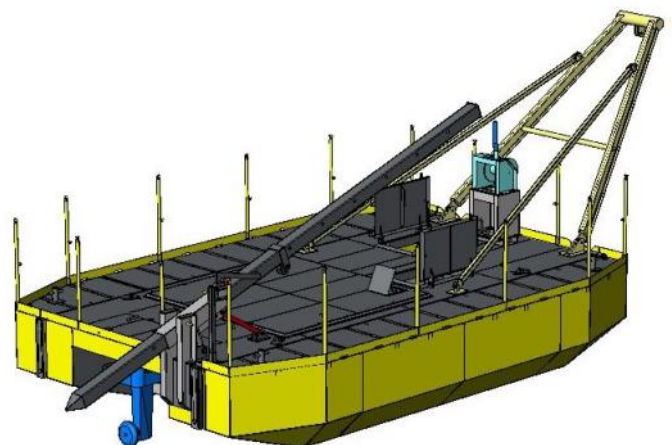

This work boat fits on a standard truck or trailer because the floaters on the side can be disassembled very quickly and easily. This keeps the width within 250 cm and creates more compartments what prevents this vessel sinks. The fuel tank (3000 Ltr) is equipped with a pump, fuel pistol & hose and volume registration. Its hoist capacity is 1500 kg using a manual winch. To keep position or gain extra horizontal power, a spud pool (tillable) is mounted which is powered hydraulically. Optional a diesel-hydraulic power pack (50 HP) can be installed which supplies the propeller or auxiliaries on board. As alternative a 25 HP outboard motor can be mounted.

Specifications:

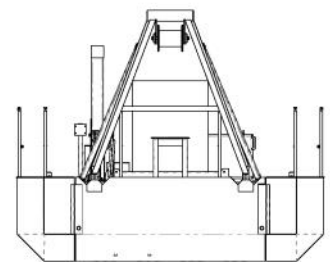

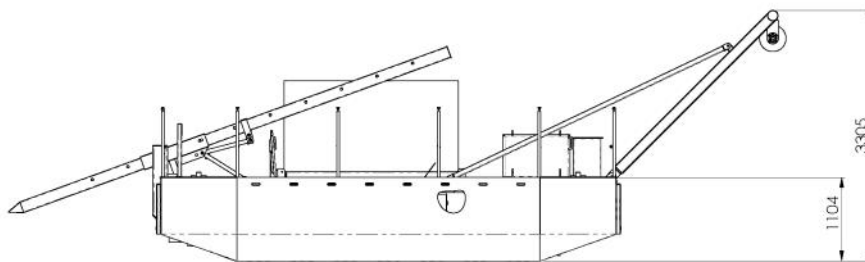

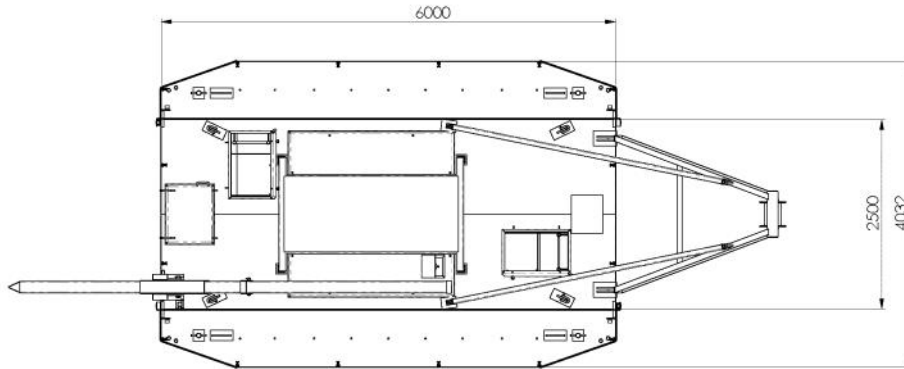

Length incl. boom	: 820 cm
Width incl. site floaters	: 403 cm
Height incl. boom	: 330 cm
Weight (dry)	: 5 ton
Payload max.	: 10 ton
Hoist load (max.)	: 1500 kg
Power source	: 50 HP / 25 HP
Fuel supply tanks	: total 3000 Ltr
Draft	: 70 cm

Advantages:

- All-in work boat with hoist winch, fuel tank, etc.
- Transport in truck within width limitations.
- Flexible and custom made design.
- Spud pool for pulling and positioning.
- Fuel tanker with a double hull and a pump, volume registration and fuel pistol.
- Disassemble railing by pools and rope.
- Power from a diesel power pack 50 HP or outboard motor 25 HP.
